

ReachVN

Update

www.reachvn.org

The causes of poverty are due to low income and inequality. Specifically in the Gia Lai region, geographic factors and living standards are the major determinants of poverty. Notably, higher incidents of death related to dangerous working conditions and poor health causing high rates of children left without one or both parents. Poverty denies children of their basic human rights. They are robbed of their childhood, better living conditions, basic health care, education and career opportunities.

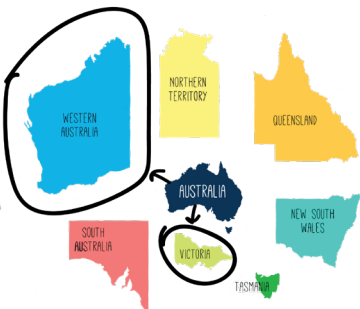

Imagine being the children who live in this narrative, trying to survive, and not being afforded the opportunity to thrive.

These are the children that **ReachVN** are impacting with their work. These are the children being impacted by YOUR generosity, whose stories are being re-written from one of despair to one filled with hope.

Vietnam is the 13th most populous country with more than 95 million people.

9.8 percent of the population live in poverty,

That means about 9 million people, that's more than Victoria and western Australia's entire population put together!!

So it is here we pause to say a
BIG THANK YOU

on behalf of these children,
for your contribution to

ReachVN through the

Perspective charity auction.

The impact **YOUR** giving

has had for these 'ones' has

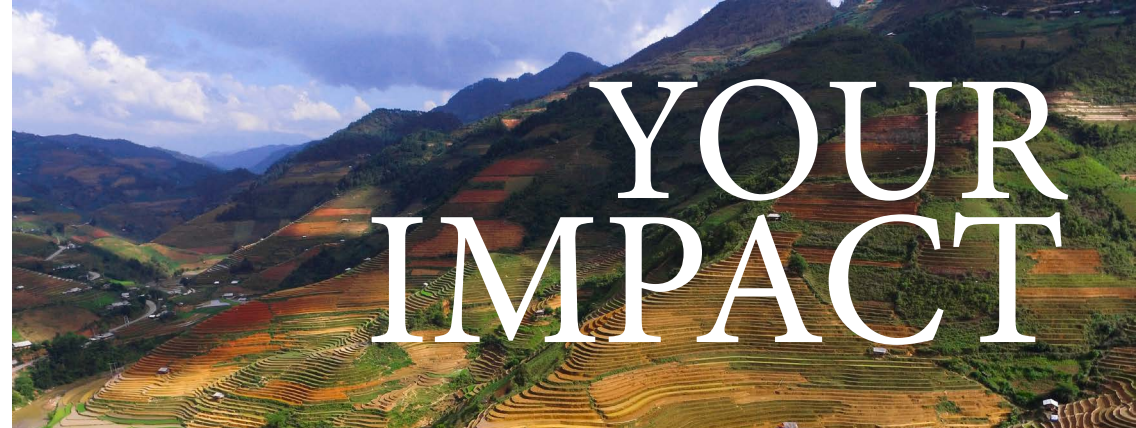

changed the narrative of

their stories for the better! We

solute you for being a part of

their unfolding stories.

**THANK
YOU**

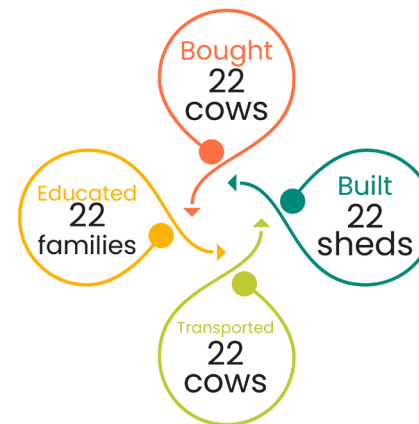

YOUR IMPACT

Below a snap shot of the money raised and the 22 children you have directly impacted this year, who have been given the resources to be empowered to take a step out of poverty.

This year **\$15,000** was raised for the Reach VN projects.

1/3

Of the total amount raised came from
YOU! through the Perspective
Charity Fundraiser.

Bought

Our ReachVN Project manager worked with a local team to source and buy healthy calves.

Built

Our ReachVN Project manger worked with local community members to build the sheds that would house the cows.

Transported

With the help of a local team, trucks were sourced and used to transport the cows and building materials all around the Gai Lai region.

Educated

Our ReachVN Project manager worked with local pastors and community to educate the families to raise and keep the young calf until it is fully grown.

90% Of the children have suffered the death of a parent.

40% still have one parent.

30% have been orphaned.

15% were abandoned by their remaining parent.

15% live in a home where the care giver suffers with a disability.

100% have been positively affected by your generosity.

We celebrate you today for being a part of these childrens stories of restored hope and change. We hope you are encouraged to see the impact you have made.

Thank you.

WHO YOU
HAVE IMPACTED

Proudly supported by

ReachVN helps with relief from poverty and works on the long-term survival of each child. We are currently helping over 400 orphans from various ethnic backgrounds, living in remote areas of Gia Lai, Vietnam. The help provided is on the basis of need. We serve all people regardless of religion, ethnicity or gender, and work in partnership with local churches. The team is comprised of volunteers who are committed in reaching these children in remote rural areas.

Our programs and activities primarily seek to reduce suffering and transform the lives of orphans, their families and communities, ultimately moving towards a decrease in poverty and increase in self-sufficiency.
